**Ian Peacock, BSEET'92**

Mr. Peacock is the Manager of Hydro Project Operations for Eaton Electrical Services and Systems. Prior to this he served as the Plant Electrical Engineer of International Paper Company in Ticonderoga, NY and Jay, Maine. He is a noted author and co-author of several IEEE white papers on subjects such as hydro automation and high resistance grounding and has managed over 50 Hydro-Electric modernization and automation projects across the U.S.

**R. Michael White, BSSE'84, MSSE'87**

Mr. White developed a novel approach to calculating Title 49 CFR Part 192.5 Class Location Studies while working for a surveying firm in Maine. He used this approach to develop software for calculating population densities and safety factors for natural gas transmission pipelines. More recently, Mr. White designed software for Rail Route Risk Analysis that is the industry standard for single-route railroads.

**Timothy Folster, BSME, PE**

Tim Folster graduated from the Massachusetts Institute of Technology in 1980 and began his 36 year career in construction with Sargent Corp. In his career he has held positions from Foreman to Superintendent to Vice President of Operations. In his 36 year career in construction, he has overseen the construction of airports, highways, landfill cells and closures, commercial site development, wind power infrastructure and remediation projects.

**Melissa Soucie, PSM (Surveying Concentration)**

Melissa Soucie studied natural resources and geomatics at UCONN. She has worked in a surveying and engineering firm in Connecticut. Upon finishing her professional science masters, she plans to dedicate more time to her work with surveying and photogrammetry organizations and intends to continue advancing her knowledge in the fields of surveying and photogrammetry while sharing information with the community.

1865 THE UNIVERSITY OF MAINE

School of Engineering Technology

# Francis Crowe Society Induction Ceremony

Saturday, May 13th, 2017
10:00 am
Hauck Auditorium, Orono, Maine

# Francis Crowe Society

## Engineering Excellence

Francis Trenholm "Frank T" Crowe (1882-1946) was a member of the UMAINE class of 1905, with a degree in civil engineering.

Among his greatest accomplishments were his projects as a civil engineer in the construction of nineteen major dams in the western United States over a forty-year period from 1904 to 1944.

Crowe made farming possible and profitable in the Great Basin, the California Central Valley, Central Arizona and the Imperial Valley through the construction of these "superdams" which redirected the flows of very large rivers such as the Colorado River.

## Francis Crowe Induction Ceremony Agenda

- Recognition of FE and FS Students
- Tau Alpha Pi Induction
  - Eunyoung Austin
  - Alex Black
  - Chad Madore
  - Justin Willis
- Frances Crowe Society Background
- Code of Ethics Preamble
- Induction of Distinguished Engineers
- Induction of Graduate Engineers
  - Melissa Soucie, PSM
  - Pascal Francis-Mezger, Masters-ECE
- Engineers Pledge
- Recognition of Family and Friends
- Closing Remarks

*Ceremonies Presented by:*

Jude Pearse, Professor of Electrical Eng. Technology

*With help from:*

Philip Dunn – CET
Paul Villeneuve – EET
Brett Ellis – MET
Raymond Hintz – SVT

*Administrative Office:*

Rosemary Lamountain
Linda Liscomb

For information on Francis Crowe Society go to: www.engineering.umaine.edu

**University of Maine – College of Engineering**

## Distinguished Engineer Inductees

**Timothy Folster**
Construction Engineering Technology

**Ian Peacock**
Electrical Engineering Technology

**Michael White**
Surveying Engineering Technology

## New SET Graduating Inductees

| ***CET*** | ***EET*** | ***MET*** | ***MET*** |
|---|---|---|---|
| Nicholas Barto | Alicia Bonney | Ahmad Alabudwahed | Matthew Merchant |
